Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by McMillan. In regard to claim 3, McMillan discloses a painting brush comprised of a tube A containing a color fluid (page 1, lines 8-14) and having a port, a lid E screw joined to the circumference of the port (via threads b and e, page 1, lines 10 and 31), a cover with a discharge hole c1, d1 inserted into the port of the tube and a brush h inserted into a brush tube G, g, F, f wherein the brush tube is centrally located on the lid wherein a bottom of the brush tube f engages the discharge hole c1, d1 of the cover, thereby opening and closing the discharge hole by screwing and unscrewing the lid (page 1, lines 44-50). In regard to claim 4, the discharge hole c1, d1 is offset from an axis of symmetry of the inner cover so as to engage the brush tube and the brush tube is axially symmetric with the inner cover.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3751

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over McMillan. As discussed supra, McMillan discloses a painting brush comprised of a tube, cover, lid and brush tube. Although the McMillan reference does not disclose the type of paint used in the brush, it is the Examiner's position that any suitable paint, including water color, can be used in the brush without effecting the overall operation of the device. Further, although the brush tube G, g, F, f is not disclosed as being integrally formed with the lid E, it is the Examiner's position that it would have been obvious to one of ordinary skill in the art at the time the invention was made to integrally form the elements of the brush tube and lid since it has been held that forming in one piece an article which was formerly formed in several pieces and put together requires only routine skill in the art. See *Howard v. Detroit Stove Works*, 150 U.S. 164 (1893).

Response to Arguments

Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new grounds of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Luchtenberg, D'Alessandro, Carleton et al. and Cole references are cited for disclosing other brush devices.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
